# How to Receive Files

（Simul Staff Member / Registered User）

1) Read the Notification E-mail

(1) Confirm email

When the files are sent, you will be notified by email that the files were received. Click the URL* in the notification email to open the download screen.

2) Download File

(1) Download

Check the contents, and click the "Download" button for the file you want to receive under "Downloads." You can download the files one by one.
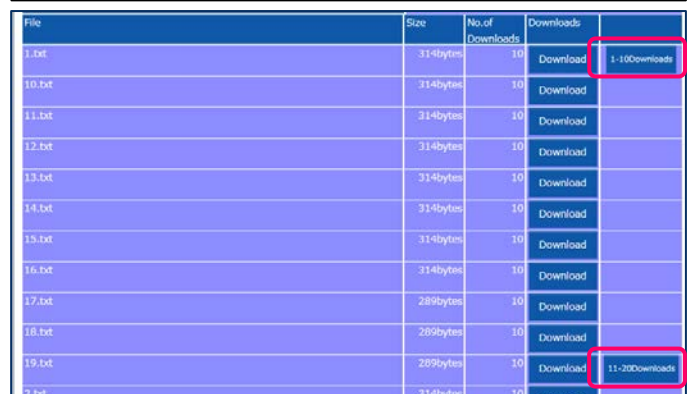

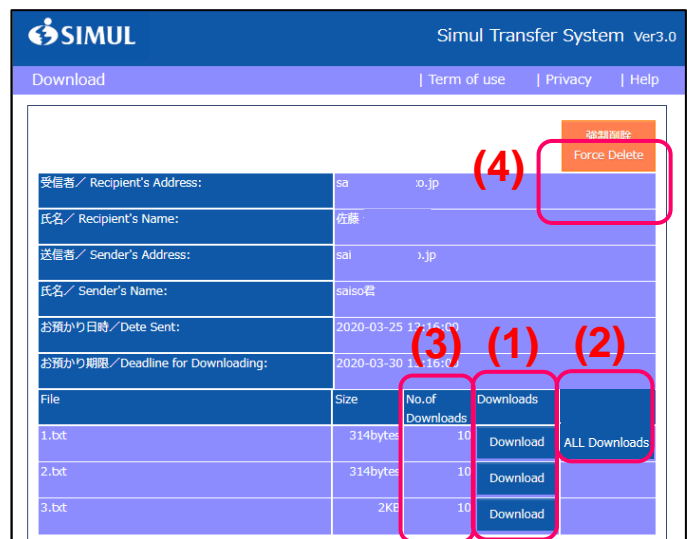

(2) Batch download

Clicking the "All Downloads" button starts downloading all the files that were received.

In the case of Chrome, one download button appears for every ten files (e.g., "1-10 Downloads" and "11-20 Downloads").

Note:

Batch download of multiple 1 gigabytes+ files puts a strain on your PC. It is recommended to download 1 gigabytes+ file one by one.

(3) Download count

Downloading is allowed for up to the number of times displayed.

(4) Forced deletion

Clicking on the "Force Delete" button deletes the file forcibly. Use this button when you want to be sure that no one other than yourself downloads the file.
